How to make a paper cross with one piece of paper and one tear

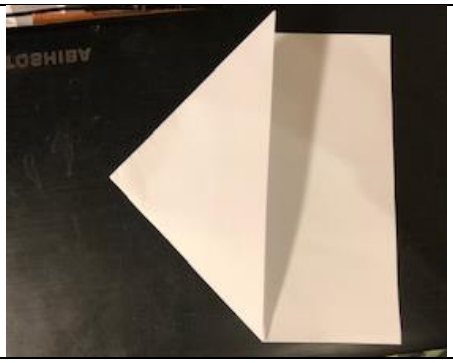

Start with an oblong piece of paper

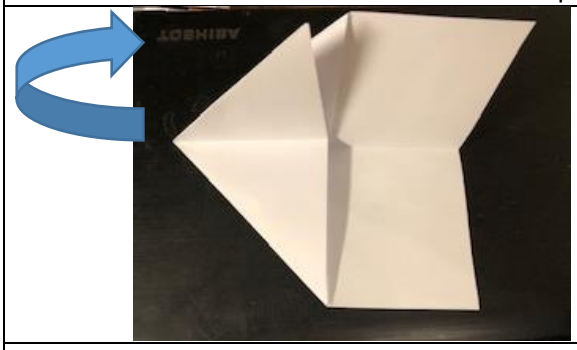

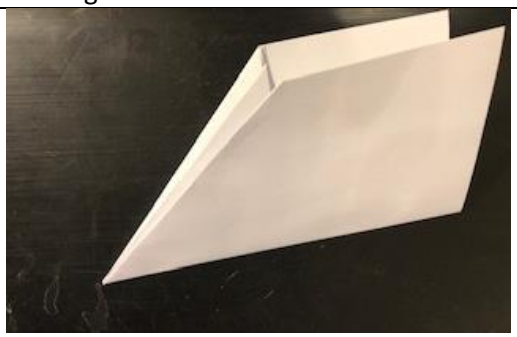

Fold one corner down to opposite edge

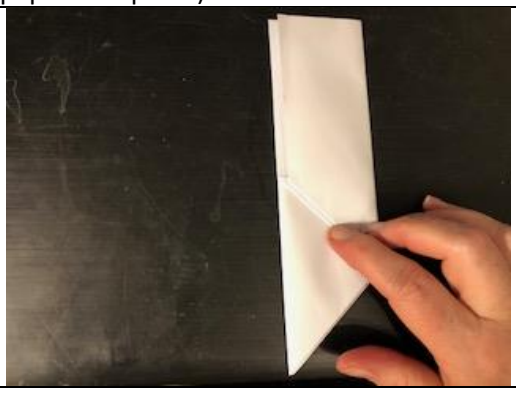

Fold point down to opposite edge

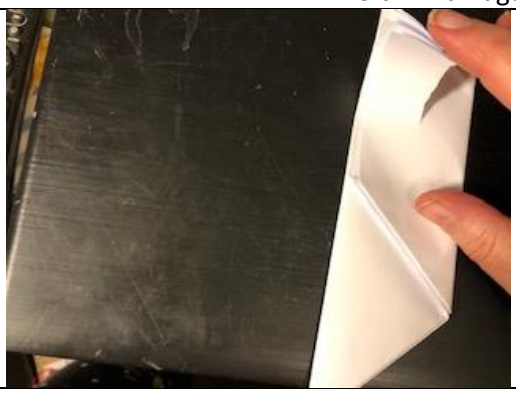

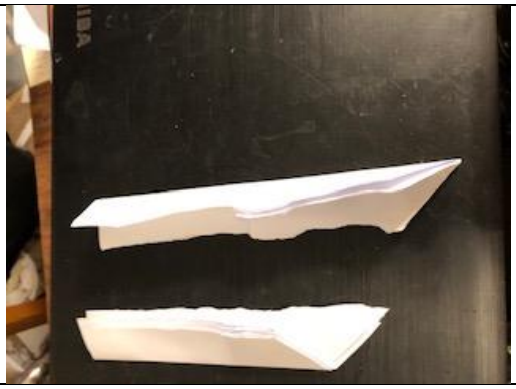

Fold in half (as though making a paper aeroplane)

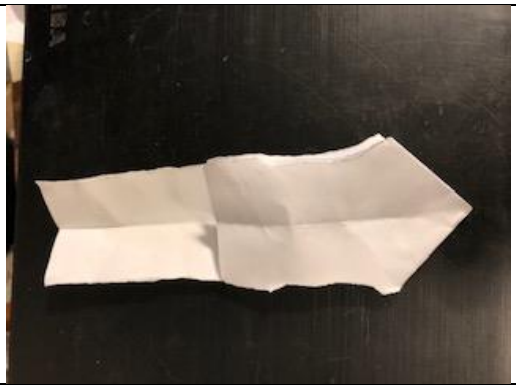

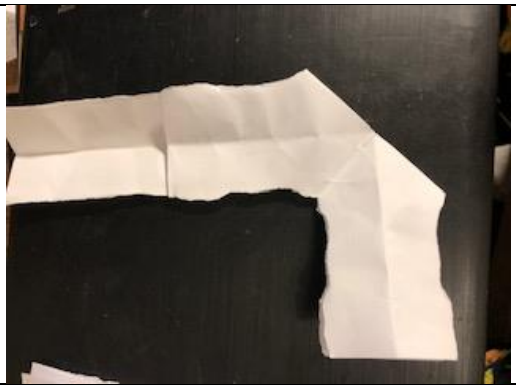

Fold in half again and turn point downwards

Tear down the middle from the flat edge right down to the sloping edge

You will find some of the pieces fall away and you are left with one folded piece which when you unfold

Opens up into a cross
